Tel. (352) 372-3505 Fax. (352) 334-0737

Log Number: 35327	Associated Log Number:	Priority: URGENT	Purpose: PLANT PROBLEM	Survey Code:
Nursery/Owner Address: N/A , FL County: Telephone: E-mail			Address/Location Collected: 175 CRISPIN ST MERRITT ISLAND, FL 32952 County: BREVARD TRS: 26 37 6 Grove Block: Lat: Long: Multiblock(s):	
Collector(s): BROOKS J SHELLEY		Sender(s): BROOKS J SHELLEY		
Date Collected: 03/26/2010	Date Sent: 03/26/2010	Date Received: 03/29/2010		
Host Scientific Name: <i>Miscellaneous</i>				
Host Common Name: <i>MISCELLANEOUS</i>				
Total Number of Plants:		Plants with Symptoms:		
Total Acres:		Total Acres with Symptoms:		
Parts Involved:				
Sender's/Collector's Remarks: Unknown fungus attacking dock pilings. Fungus is completely devouring wood from outside.				
Diagnosis:				
Rank	Type	Disease/Agent	Agent Detail	
	BIOTIC	Hormonema sp.		
Diagnosis Comments: This fungus was recovered from discolored wood from the affected piling. Although this genus is known to be found on utility poles, its role as a wood rotter is unclear and unlikely.				
Determiner(s): R. LEAHY		Recipients: CHRISTINE FRERE, BROOKS J SHELLEY, LEO SANSOUCY		Date Completed: 04/22/2010
